DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "width" in line 7. There is insufficient antecedent basis for this limitation in the claim. Applicant should set forth --a-- width.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bauer (2,816,302). Bauer discloses a tap (16) having a beveled lead (26) on chamfered teeth (22,23) (fig. 7 and column 2, lines 42-70). In figure 7 the chamfer (23) is shown to be decreasing in width. In column 3, lines 4-7 Bauer discloses a chamfered crest side (30) and beveled edges (26).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Japan (57-189735) (cited by Applicant). 57-189735 discloses chamfers (8,9) adjacent crest face

Application/Control Number:

10/549,452 Art Unit: 3725

(4) in figures 5,6,7a and 7b. The chamfer (8) in fig. 5 and the chamfer (9) in fig. 6 decrease in width.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bauer (2,816,302) in view of Henderer et al. (7,147,413). Bauer does not disclose a hardened steel, coated tap with a concentricity tolerance. Henderer teaches (column 3, lines 30-35 and column 4, lines 55-60) that it is known to grind a metal carbide tap (column 3, lines 15-22) having a coating (column 4, lines 4-10) to a concentricity tolerance. It would have been obvious to one skilled in the art at the time of invention to grind the tap of Bauer to a concentricity tolerance as taught by Henderer in order to reduce runout during tapping.

Response to Arguments

Applicant's arguments filed 10-25-2007 have been fully considered but they are not persuasive. Applicant did not respond to the rejection of claim 1 under 35 USC 102(b) using cited Japanese reference 57-189735. The rejection of the First Office Action is repeated.

The Examiner has withdrawn Yamada in response to Applicant's amendment and has provided a new reference to Bauer.

Application/Control Number:

10/549,452

Art Unit: 3725

Applicant has argued (page 4 of response) that a width of each of the chamfers... is set forth in the Specification paragraph [0015]. The Examiner does not see where a width is stated but it is assumed that this limitation is the width of 10-200 micrometers in fig. 1a. Both Bauer and the Japanese reference both show decreasing chamfer width.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
